Projects

Time Tracker <https://github.com/Dominik-Ilja/time-tracker>

- Tracks time spent doing a task. Updates will include authentication and data visualization.
- Developed a backend to perform CRUD actions for creating categories and logs.

Poke Finder <https://github.com/Dominik-Ilja/poke-finder>

- Retrieves data from a 3rd party api and allows users to search and filter data based on name or type.
- All individual pages are dynamically created with React Router.

Battleship <https://github.com/Dominik-Ilja/battleship>

- Users play against an AI. User's can drag and drop game pieces and all moves are checked for validity.
- Currently being updated to be played in real-time by two players.
